

DA-20-C1 Rudder Pedal Adjustment Operating Tip

Are you having trouble adjusting the rudder pedals in the DA-20? You are not alone. The POH doesn't explain it very well. Here is the trick to move the pedals with ease:

- When pushing the pedals back, place your toes down low so the pressure is applied to the bottom of the pedal. The goal is to keep the pressure as close to the sled tube as possible to avoid binding.
- Do not push on the top of the pedals.
- Never push on the "S" tubes. This could bend the tubes.
